Background

An engaging two day training course designed to provide attendees with a detailed overview of the procurement process and the various tools and techniques that can be used to deliver sustainable procurement solutions within construction projects.

Why should you attend?

- gain the skills and confidence to deliver sustainable procurement in construction
- understand the regulatory framework and the British Standard on Sustainable Procurement (BS8903)
- understand how construction and sustainable procurement can be integrated and enabled
- learn the process for developing a sustainable sourcing strategy
- understand the tendering process for evaluating and appointing suppliers
- understand how to manage suppliers to deliver improved sustainable procurement outcomes
- receive a copy of CIRIA's *Guide to sustainable procurement in construction* (C695)
- obtain twelve hours CPD accreditation.

Who should attend?

The training will be relevant to procurement practitioners with a basic understanding of sustainability.

Course materials

Delegates will receive course handouts and a copy of CIRIA's *Guide to sustainable procurement in construction* (C695).

Programme times: 09.00–17.00

Course content

Day 1

- introduction to sustainability in construction and sustainable procurement
- sustainable construction progress and challenges
- applying BS8903 to construction projects – including the unique aspects of a construction project
- sustainable procurement fundamentals
- sustainable procurement enablers
- session summary & Q&A session.

Day 2

- recap and outline of day two
- identification of needs and wants through procurement
- developing a sourcing strategy
- identifying suppliers
- evaluating and awarding suppliers
- managing relationships and performance
- delivering continuous improvement and development of sustainable procurement processes
- session summary & Q&A session.
